SOSTURMAC

Co-operation area

Canary Islands (Spain)

Cape Verde

SOSTURMAC aims at introducing sustainable actions that will add value to both the natural and architectural heritage of the Canary Islands and Cape Verde. The project is repositioning both islands' architectural heritage from a sustainable point of view, promoting the development of low carbon tourism products, and the conservation of heritage values. It is expected that the actions will position both islands as innovative, cultural and natural tourist destinations.
